Details

- Highly conformable with a pressure-sensitive, acrylic adhesive
- Flame-retardant and has polyamide backing
- Suitable for use as wave solder masking tape in a printed circuit board assembly
- Designed for anchoring leads and terminal boards
- Withstands a temperature rating of -40 to 311 degrees F (-40 to 155 degrees C)
- UL Listed and RoHS Compliant

3M™ Tape 1205 is a polyimide film-backed electrical tape. This flame-retardant tape is suitable for use in applications that require thin, insulating material for wrapping transformers, capacitors and wire harnesses. This tape withstands a temperature range of -40 to 311 degrees F (-40 to 155 degrees C) without the loss of electrical properties and tensile strength.

3M™ Polyimide Film Electrical Tape 1205 has a pressure-sensitive, acrylic adhesive that offers optimized adherence. This tape is designed for anchoring leads/terminal boards. It is ideal for use as wave solder masking tape in a printed circuit board assembly. This flame-retardant tape is highly resistant to heat and solvents. UL Listed and RoHS 2011/65/EU Compliant.
