Pictures and videos

details

The cream-colored epoxy liquid resin is thixotropic, trowelable, medium-flexible and characterized by excellent moisture resistance. Insulation class: F (155 ° C)

- Maximum temperature resistance up to 155 ° C
- Thermosetting resin system
- Thixothropes resin
- Flexible means
- Suitable for filling
- Good impact resistance
- High baking strength
- Solvent-free

Recommended applications

- Embed electronic modules, transformers, etc.
- Spackling of cavities, eg on winding heads

---

specifications

flame retardant	**Yes**
hardness	**65 Shore D.**
Content / volume	**5.4 L**
material	**Thixotropic Epoxy**
Maximum operating temperature (Celsius)	**155**
