Details

- Transparent, double sided, 5 mil (0.13 mm) transfer tape offers a thin profile combined with our high strength acrylic adhesive for a long-lasting bond
- Short term temperature tolerance of up to 500 °F (260 °C)
- Operating temperature tolerance of up to 300°F (149°C)
- Conforms to a variety of indoor and outdoor applications
- 58# unprinted polycoated kraft paper liner for moisture stability and easy die cutting
- Durable adhesive is chemical, UV and solvent resistant
- Ease of application increases productivity

3M™ Adhesive Transfer Tape 9469PC is a thin, double sided tape capable of conforming to a wide variety of applications. Designed with 5 mil 3M™ High Performance Acrylic Adhesive 100MP, our Adhesive Transfer Tape 9469PC establishes exceptional holding power and long-lasting adhesion for fast, strong results.

Durable Design
3M™ Adhesive Transfer Tape 9469PC utilizes the bonding power of 3M™ High Performance Acrylic Adhesive 100MP, providing much higher adhesion strength than typical pressure sensitive adhesive systems. This acrylic adhesive creates immediate handling strength for fast results and offers performance longevity and durability. It conforms well to a variety of both indoor and outdoor applications and is chemical, UV and solvent resistant.

Recommended Applications
Ideal for use in many indoor and outdoor industrial applications, 3M™ Adhesive Transfer Tape 9469PC provides solutions such as industrial joining and metal fabrication.

- Replacing rivets, spot welds, liquid adhesives and other permanent fasteners
- Bonding decorative metal trim
- Bonding flexible printed circuits (FPC) to aluminum stiffener or heat sinks
- Panel to frame bonding

3M™ Adhesive Transfer Tape 9469PC is commonly used for attaching components to exterior surfaces of aircraft; such as scuff strips and lightening protection antennas

All That Adhesive Transfer Tape Can Offer
3M™ Adhesive Transfer Tape 9469PC comes with a 4.2 mil, 58# unprinted polycoated kraft paper release liner. This liner boasts moisture stability, enables easy die cutting and stands up to challenging applications. Our tape enhances the appearance of your product by eliminating rivets and screws. In most cases, fastening with our transfer tape is a quicker and easier process than drilling, fastening or using liquid adhesive. Quick adhesion and ease of application delivers fast results and increased productivity.

This tape features an adhesive transfer tape with acrylic adhesive. The result is an extraordinarily strong tape that adheres to the broadest range of substrates, including glass, metal, polyimide, rigid PVC, acrylic, polycarbonate and polystyrene.

Explore the Possibilities
Explore the advantages that a reliable solution offers. 3M™ Adhesive Transfer Tape 9469PC provides unlimited design and application possibilities. Enjoy the increased productivity through instant handling strength and ease of application. Proven to be a durable, long-lasting solution, our Adhesive Transfer Tape is formulated for success.

3M™ Adhesive Transfer Tape is available with varying adhesive thickness. For 2 mil (0.05 mm) see F9460PC; for 10 mil (0.26 mm) see F9473PC.

wonderful adhesion !

Wish to use this tape for attaching pure gold foil on pure silver metal sheet for decoration purpose in an outdoor application. Attached gold foil to silver sheet using this tape and made a sample for testing. Conducted pressure cooker test, where there is water , pressure and temperature all at same time. After the test , adhesion of gold foil to silver sheet is found to be satisfactory.
