KITLOPRESSMPX12: Low Pressure Evaluation board for MPX12 family ☆

Overview | Buy / Specifications | Training & Support

Buy

For very low pressure measurement applications, Freescale offers the KITLOPRESSMPX12 evaluation board. This board accomodates all the packaging options with the MPX12 series of Pressure Sensors. This low-pressure reference design will provide excellent performance over temperature and pressure with an amplified output.

Features

- Pressure Sensor not included. User will need to order samples separately
- Evaluation Board with 600 Ohm series resistor and differential amplifier
- Evaluation Board will accommodate the following MPX12 Series packages:
  - Unibody
  - Small Outline Package (SOP)
  - MPak Chip Pak
- Application note available for implementation method

KITLOPRESSMPX12: Low Pressure Evaluation Board for MPX12 Family

Supported Devices

MPXx12: 0 to 10kPa, Differential and Gauge, Uncompensated Pressure Sensor
