★★★★★ Worked perfectly and super fast international shipping

about 3 years ago by Member #836574 ✔ verified purchaser

Needed it for a Rorschach mask for a 21st party. It worked great for that and there were many impressed party goers.

In terms of shipping I ordered on a Monday arvo (New Zealand) so Sunday in the USA. Used FedEx express, half the price of usps express and more reliable. It arrived 3 days later on the Thursday (NZ time) just in time for the party the next night. Would definitely order from here again. Thanks.

★★☆☆☆ Spotty Quality

about a year ago by VisualVoice ✔ verified purchaser

The pigment was littered with tiny white flakes. The same was true for the red and the blue pigments. The flakes didn't mix well with the acrylic medium, resulting in a textured paint finish. The thermochromism still worked, but I found the quality of the paint to be somewhat disappointing. Canadian customers: be aware that you will have to pay import duty (I paid on my order)
