Any way I can find one of these for the 4 wire connectors like the ones used on your fingerprint scanners?

una.veritas / about 4 years ago / ★ 1

The cable/pin 6 is distinguished by its grey color in this product, and it can lead to a pin-number misunderstanding with other JST SH Jumper 6 wires whose pin 1 cables are grey. I guess the line going to GPS pin 1 is distinguished in this product. Please consider giving notes.

These are like 30ga stranded wire that's really hard to solder to headers to use on a breadboard. It's better than cutting up the one that comes with the module though, in case you screw up.

In 2003, CU student Nate Seidle blew a power supply in his dorm room and, in lieu of a way to order easy replacements, decided to start his own company. Since then, SparkFun has been committed to sustainably helping our world achieve electronics literacy from our headquarters in Boulder, Colorado.

No matter your vision, SparkFun's products and resources are designed to make the world of electronics more accessible. In addition to over
