6-outlet surge protector with USB-A ports safeguards your home/office electronics against dangerous surges, spikes and line noise.

Features

6-Outlet Surge Protector Safeguards Your Sensitive Electronics Against Power Fluctuations Ideal for your home or office workstation, this Protect It!® 6-outlet surge protector features a surge suppression rating of 250 joules and provides protection in line-to-neutral (L-N) mode to defend your sensitive electronic components against power surges and spikes.

Charges 2 Mobile Devices with 2.1A of Shared Power In addition to AC outlets, this power strip provides USB charging for up to two mobile devices, including smartphones, tablets and e-readers. The USB-A ports eliminate the need for AC adapters for charging cords, leaving outlets available for AC equipment.

German Type F Outlets Accept a Wide Range of Electronic Devices Plug your PC, printer, scanner, router, modem, television, stereo receiver or other home/office electronics into six Schuko outlets to protect them against dangerous surges, spikes and line noise. The 1.8-meter AC power cord with space-saving right-angle Schuko plug helps you connect the surge protector to a wall outlet located behind furniture.

Premium Protection from EMI/RFI Line Noise Helps Your Equipment Perform Better Various electromagnetic and radio sources found in virtually every home and business can cause disruptive interference on the AC line. Known as EMI (electromagnetic interference) and RFI (radio frequency interference), this line noise is a common cause of performance problems. This surge protector filters out disruptive line noise that can disturb your electronics and inflict hardware damage or data loss. This EMI/RFI filtering also helps your connected components perform better and last longer.

Vertical or Horizontal Mounting for Desks and Workbenches Pull-out mounting tabs on the back of the surge protector allow you to install it on any flat surface, including walls, with user-supplied hardware.

Premium Safety Features for Protecting Your Valuable Equipment In the event of an overload, a 16-amp circuit breaker immediately shuts down the power strip to prevent equipment damage. The high-impact plastic housing is designed for the rigors of everyday use.
