PINOUT

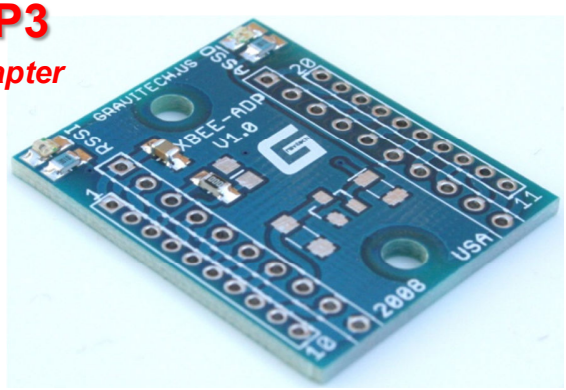

XBee socket

3V3/IN (1)	DIO0 (20)
DOUT (2)	DIO1 (19)
DIN (3)	DIO2 (18)
DIO12 (4)	DIO3 (17)
RESET (5)	RTS (16)
RSSI (6)	ASSOCIATE (15)
DIO11 (7)	VREF (14)
NC (8)	ON (13)
DTR (9)	CTS (12)
GND (10)	DIO4 (11)

* See schematic for more detail.

XBee-ADP3

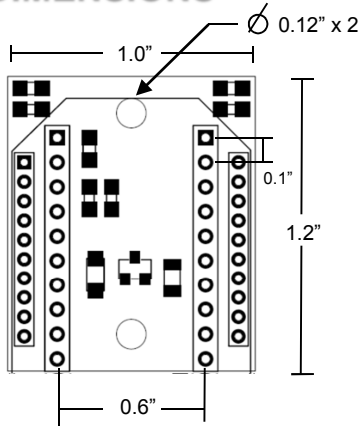

3.3V XBee adapter

electronic experimental solutions

Copyright © 2008 Gravitech
WWW.GRAVITECH.US

DIMENSIONS

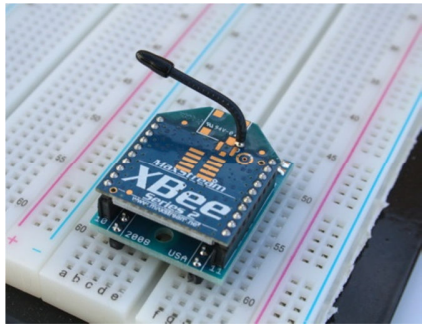

FEATURES

- Works with all XBee modules including the Series 1, Series 2, and Series 2.5; standard and Pro.
- Included male header pins
- Accessibility to every Xbee pin
- Two mounting holes
- Compact size 1.0" x 1.2"
- 0.1" spacing (breadboard friendly)
- RSSI and ASSOCIATE LEDs

DESCRIPTION

It is the easiest and most reliable way to connect the Xbee module to your favorite microcontroller. This is a 3.3V version, which means it is for a 3.3V logic microcontroller. If you have a 5V microcontroller, use XBee-ADP5. There are two LEDs that can help you monitor and quickly troubleshoot.

XBee and XBeePRO are Treadmarks of Digi International Inc.
