Description

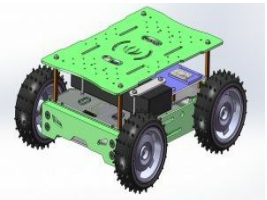

4WD Hercules Mobile Robotic Platform adheres to the spirit with strong power and complete function, and it is a companion for you to enter into the robot world where you can make your own robot mobile platform. Hercules, the Titan in Greek mythology, is widely known for his strength and spirit of adventure.

It consists of the component of Hercules motor controller, Hercules skeleton, gear motor etc. The Hercules motor controller can consistently support the current up to 15A and driving voltage in the range of 6V-20V, thus, it can supply strong motive power to the whole platform. The Hercules skeleton is made up of aluminium alloy plate

That's not a question nor an answer but I'd like to leave some feedback. Absolutely love this platform and its motor controller! I've tried several different platforms on my home hobby robots and this one is the most powerful and small at the same time. I'd like to thank Seeedstudio for these amazing products.
