

Wio Link Event Kit

SKU 110020048

Description

Wio Link Event Kit is an event-monitoring kit which includes some typical event-triggered Grove functional modules to build smart IoT devices. The most amazing part of this kit is the Wio Link development board which can be utilized for various devices: without a bit programming skill required. All the actions you want your modules performed and the flashing code operation to Wio Link could be completed with taps in a mobile app. And you can send instructions to your devices over the internet at anywhere. So Wio Link will be a perfect utility to making things around smarter for everyone.

Features

- Include common frequently-used event-monitoring functional modules
- Completely easy to make things around you smarter
- Grove port interfaced, more practical function and less work
