Description

The TLP410DMUSB Protect It!® 4-Outlet Surge Protector features four NEMA 5-15R outlets and a surge suppression rating of 1500 joules to protect your components against surges, spikes and EMI/RFI line noise that can damage sensitive electronics and destroy data. Plus, two USB ports produce 2.4A of combined power to charge your mobile devices, such as smartphones, tablets and MP3 players. Recommended for home or office workstations, the TLP410DMUSB is designed for installation in your desktop's 60-millimeter (2.4 inches) grommet hole (if your desk has no pre-cut hole, you can drill one yourself). It folds onto the desktop for connection of equipment. An LED indicates surge suppression at a glance. A resettable 15A circuit breaker shuts down equipment in case of an overload.
When not in use, straighten the TLP410DMUSB to a vertical position and push it down into the grommet until it's flush with the desk surface. The 10-foot (3.1-meter) power cord is long enough to reach distant AC outlets. Permanent mounting to the desk helps deter theft.
Tripp Lite will repair or replace any connected equipment damaged by surges up to $20,000 for life (valid in the U.S., Canada and Puerto Rico only).
