WIZ750SR-100

Overview

WIZ750SR-100 is the compact sized serial to Ethernet module using W7500, WIZnet iMCU, cortex-M0.
WIZ750SR-100 is included External IC+ PHY chip.
WIZ750SR-100 is the protocol converter that transmits the data sent by serial equipment as TCP/IP data type, and converts back the TCP/IP data received through the network into serial data to transmit back to a serial equipment.

Features

- Serial to Ethernet Module based on W7500
- Included External IC+ PHY chip
- Pin-header 2.00mm type module
- TTL Serial signals: TXD, RXD, RTS, CTS, GND (optional DSR,DTR)
- Support the configuration method of AT command & Configuration tool program
- Support password function for the security
- 10/100Mbps Ethernet & Max.230kbps serial speed
- Support WIZ VSP (Virtual Serial Port) program

Hardware Specification

- Dimension (mm) : 48(L) x 30 (W) x 12 (H)
- Input Voltage: 3.3V
- Max, Power Consumption: TBD
- Operation Temperature: -40 ~ 85c
- RoHS, SVHC Compliant

Evaluation Board

- WIZ750SR-EVB

WIZVSP

WIZVSP Program for Windows

- Last Update: 2017.04.28
- WIZnet Virtual Serial Port: It can be used to change the device that is connected to the PC through the existing serial interface to control by the remote Ethernet network.
- When you agree to the End User License Agreement for WIZVSP on our website form, you will be able to download the program and get a registration key. When registering the product with license agreement, the MAC address of the product in use and the email address of the contact person are required.
